

fact sheet: security solutions

Verizon Vulnerability Management

Vulnerability Management Solution

Your customers assume that you are safeguarding their confidential data and maintaining the integrity of your network. You need a streamlined approach for identifying and fixing network security vulnerabilities. You also need help addressing the many information security industry standards and regulatory requirements in place today, such as PCI, HIPAA, GLBA, ACSII 33, ISO 2700. We can help.

Stay Ahead of Potential Risk and Possible Attack

Verizon Business offers an on-demand scanning system that enables you to control asset discovery, scan scheduling, reporting, drill-down analysis, and remediation activities, while we implement, manage, and support the technical infrastructure at our global hosting facilities.

The **Verizon Vulnerability Management** service provides you with advanced scanning, identification, and scoring technology enabling you to identify and address your most critical vulnerabilities, where they can have the most impact on your sensitive data, or on your business as a whole. We will provide you with the expertise to easily run scans and perform analysis that deliver comprehensive information about your network to help keep you ahead of potential risk and possible attack.

How It Works

With **Verizon Vulnerability Management** service, we will provide setup and configuration of your appliances based on your particular business needs. We will also help you train your staff to effectively run and analyze scans.

The Vulnerability Management service allows you to track and prioritize vulnerabilities so you don't waste time making unnecessary changes. And because it operates enterprise-wide, you can see exactly where your vulnerabilities are so you can maintain security and consistency in enforcing your security policies.

In Need of a New Vulnerability Management Solution?

Is your current scanning service not living up to the hype? Don't jeopardize your business and settle for anything less. **Verizon's Vulnerability Management** solution offers world-class capabilities: on-demand scanning and report generation, interactive drill-down analysis, automated remediation, limited false positives, and a comprehensive, enterprise-wide implementation.

Why Verizon Business?

Our solutions combine security and infrastructure to help you secure data, identities, and your customers' confidence from the desktop, along your network and around the world. Your company's reputation and your customers' trust are some of your most valuable assets. Verizon Business is ready to help you mitigate security risks and secure your network to help you retain your customers' trust.
